## Managed Private Cloud

**Private Cloud as a Service** - fully isolated, secure cloud environments, with application specific stacks, tailored and rightsized for your requirements. Realise the benefits of the public cloud, with the greater levels of control and security of a fully hosted, single-tenant, dedicated environment. Let us manage your private cloud infrastructure under a **single, easy to manage Service Level Agreement (SLA)**. With **no vendor lock-in**, and a single cloud service provider, we deliver your cloud, your way.

### vScaler Connect

Formed from a secure dark fiber network that surrounds London and through a collaboration of global communication providers, vScaler Connect has the ability to deliver your data in a fast and secure way

### vScaler Appliance

Deploy an on-premise private cloud in minutes, add cloud based services or applications, and scale to public or hybrid cloud environments on-demand - all under a single management portal.

### vScaler Hosting

Our superior hosting packages, connectivity and processing power enables our customers to access the full potential of the modern cloud solution at a cost-effective price.

Global Connectivity	What's Included? Hardware	Co-Location
<input checked="" type="checkbox"/> vScaler Connect	<input checked="" type="checkbox"/> SW Licenses with 3yr support	<input checked="" type="checkbox"/> Multiple locations & options
<input checked="" type="checkbox"/> London Dark fiber network	<input checked="" type="checkbox"/> 2U appliance with 3yr warranty	<input checked="" type="checkbox"/> 2KW - 25KW Racks
<input checked="" type="checkbox"/> Private 100Mb-10Gb lines	<input checked="" type="checkbox"/> Application specific stacks	<input checked="" type="checkbox"/> Tier1 & Tier2 carrier options
<input checked="" type="checkbox"/> Business grade Internet	<input checked="" type="checkbox"/> Fast tiered storage	<input checked="" type="checkbox"/> Trusted security
<input checked="" type="checkbox"/> Fiber, uncontested, low-latency	<input checked="" type="checkbox"/> Network 25GB	<input checked="" type="checkbox"/> Tier 3 resilient infrastructure
<input checked="" type="checkbox"/> vScaler Cloud eXchange	<input checked="" type="checkbox"/> All cables and Interconnect	<input checked="" type="checkbox"/> Full component monitoring

\*Pricing subject to final specifications, location and SLA

## VSCALER MANAGED SERVICES

### Managed Private Cloud

Fully isolated, secure cloud environments, with application specific stacks, tailored and rightsized for your requirements. Hosted on or off prem, managed by us

### Managed Hosting

We run your infrastructure in one of our highly secure, highly resilient DC's leaving you to focus on mission-critical applications

### vScaler Connect

Privately owned IP network with 100G dark fibre back bone with direct access to Cloud Service Providers

### Application Services

Dedicated experts from a broad domain pool that can assist you in optimising your application specific stack

### Professional Services

Including options such as service on-boarding and offboarding, we ensure a smooth migration to cloud with the help of our experts.

### Support and Expertise

First class industry knowledge resulting in leading edge innovation coupled with 24/7 customer service and support

## OVERVIEW

vScaler Managed Services help companies leverage on demand, high-performance cloud technology. We take on the complexities of private, public and hybrid clouds including Infrastructure, hosting services, and connectivity. We combine know-how, security, and software to meet your 'as a service' requirements.

## FULLY MANAGED OR CO-MANAGED

The vScaler Managed Services Suite is offered as optional modular add-ons or as a complete bundle. Take over whenever you need and let vScaler do the hardwork.

## A SINGLE SLA

Let us manage your private cloud infrastructure under a single, easy to manage Service Level Agreement (SLA). With no vendor lock-in, and a single cloud service provider, we deliver your cloud, your way.
